2019-12-05

Subject: Reference for Benedikt Steiner (XPLORE GLOBAL Ltd.)

I am very pleased to confirm that Benedikt Steiner has been engaged as Technical Director and consultant at Southern Cross Britannia Ltd. (SCB) since August 2019. In this role he manages and spearheads all mineral exploration-related activities of SCB across our target areas in Argentina, and provides technical expertise as Qualified Person to the company leadership team.

To date, Benedikt has made a distinct impact on our business and helped to steer the focus of our porphyry and epithermal gold-copper exploration strategy for 2020. He successfully outlined new exploration targets that have now been applied for licensing. In addition, Benedikt undertook a detailed portable XRF analyser orientation and testing study, which significantly helped us to produce reliable results for investor reports.

Benedikt is a driven, reliable and hard-working individual, with a clear passion for mining geology. I will happily recommend him as a mineral exploration consultant.

Yours sincerely,

Christian Moebius
Director
